

CATALIN WAACK

Independent AI Consultant and Product Engineer

20 years in tech · AI Systems · Automation · Full-stack Products

hello@catalinwaack.com · catalinwaack.com · linkedin.com/in/catalinwaack · github.com/c4t4

Independent contractor · Remote across Germany, EU and international markets · German and English

PROFILE

I have worked with technology for 20 years. At 14, I started with web security, studying exploits and SQL injection, and built my first websites while still at school. That led to formal IT training, computer science studies and an award in an interdisciplinary university competition for a dementia-support concept. Since 2015, I have worked professionally across infrastructure, data, web development and product engineering; independently since 2018. I design and build AI-enabled products, automations and internal tools from requirements and architecture through implementation, integrations and production operations.

"In our network, he has an outstanding reputation. Personally, I can say that he is a one-man army. He's pragmatic, solves problems efficiently, and has the right experience."

Thomas Marbella, Founder & CEO, OneCode GmbH

SELECTED RESULTS

- **3 days to first build; 6 weeks to launch.** ElectaCar went from kickoff to a live EV product.
- **Paying customers in 3 months.** Took Syntax from concept to an operational B2C learning platform.
- **REWE and EDEKA won.** Built the Tailorwine B2B MVP used to demonstrate and sell the product.
- **Used by the German government and 7 of the 10 largest DAX companies.** Led product technology at VOXR.
- **R&D with a former NVIDIA manager.** Built real-time audio-motion signal processing across iOS, Python and server systems, with a patent objective.

SELECTED EXPERIENCE

ElectaCar

AI Product Consultant / Lead Product Engineer | 2026

- **From kickoff to a working build in 3 days and a live product in 6 weeks.** Owned product and technical delivery for a Hong Kong electric-vehicle platform.
- Turned fragmented vehicle data and manual publishing work into structured search, comparison, calculation, localization and administration workflows.
- Shipped government-price ingestion, AI-assisted research, insurance matching and dealer operations alongside the customer-facing product.

Heyamigo

Creator / AI Product Engineer | 2026

- Created an open-source AI assistant that runs Claude, Codex or Grok through WhatsApp and Telegram, with durable queues, memory, browser delegation, reminders and voice workflows.
- Published on npm with over 2,000 downloads.

BREAKEATS LLC

Product Engineer - Contract | 2024 - 2026

- Worked directly with a former NVIDIA manager and multiple-patent holder on novel audio-motion signal-processing R&D with the objective of pursuing patent protection.
- Designed real-time synchronization and pattern recognition across iOS and server systems, combining FFT-based frequency analysis with accelerometer, gyroscope and headphone-motion data.
- Built the supporting research and product infrastructure: Swift/CoreMotion capture, Python signal analysis, latency-aware matching, scoring algorithms, visual diagnostics, APIs and background processing.

SELECTED EXPERIENCE (CONTINUED)

FAMFAM via DAYONE

Senior Frontend Developer - Contract | 2024

- Built FAMFAM, a music-community and event app co-founded by the Keinemusik DJ collective, in a cross-functional team of more than ten.
- Implemented artist and music content, event and guest-list flows, reservations, invitations, profiles, push notifications and Stripe donations with React Native, Expo and TypeScript; the launch reached over 12,000 users and the App Store Top 10 in Music.

Verlag des Österreichischen Gewerkschaftsbundes

Frontend Developer - Contract | 2024

- Worked with design and engineering to migrate an extensive portfolio of websites to Adobe Experience Manager.
- Implemented new interfaces and reusable frontend patterns with React, Tailwind and BEM across a complex publishing environment.

Syntax Institut

Lead Product Engineer - Contract | 2023 - 2024

- **Took a B2C learning platform from concept to paying customers in 3 months.** Owned architecture, frontend, backend and the core commercial integrations.
- Built the commercial product with Next.js, TypeScript and Strapi: authentication, modular courses, video, articles, assignments and quizzes, progress tracking, certificates, Stripe payments and subscriptions, and Calendly.

Tailorwine

Senior Full-stack Engineer and Product Manager - Contract | 2022

- Built the B2B MVP that helped the company win REWE and EDEKA as customers.

VOXR

Chief Technology Officer | 2017 - 2020

- Led product technology used by the German government and 7 of the 10 largest DAX companies, designed for unreliable live-event connectivity.
- Progressed from business-development trainee to CTO and helped pivot the product portfolio during the COVID-19 disruption.

TECHNICAL AND PRODUCT WORK

- AI agents and custom RAG pipelines with LangChain/LangGraph, Haystack and RAGFlow
- Custom MCP servers, connections and tool integrations
- GEO and LLMO with llms.txt, agent discovery and AI-readable product surfaces
- Core stack: TypeScript, React, Next.js, Node.js, Python, PostgreSQL, Shopify/Hydrogen and Strapi
- Product discovery, architecture and live delivery
- Full-stack product development, data integrations and production operations
- Interim product and technical leadership

OTHER PROJECTS

- **Rivoara + Runtime Affiliate, 2025.** Built Rivoara's multilingual Shopify Hydrogen storefront with TypeScript, React Router and Oxygen, plus a multi-tenant affiliate platform with Next.js, PostgreSQL and Drizzle for attribution, Shopify webhooks, commissions, analytics and payouts.
- **NoMoreApply - Co-Founder / Product and Infrastructure Engineer, 2024.** Built the public product and production infrastructure for an engineering community with over 80 members, including applications, peer review, invitations and lifecycle automation.
- **edeltravel Luxusreisen GmbH - Product Engineer, 2022-2023.** Created a Tailwind-based design framework for non-technical teams in luxury travel.
- **Earlier technical roles, 2015-2017.** Frontend delivery at msg DAVID, medical-data work and an award-winning dementia-support concept at the Peter L. Reichertz Institute, plus Linux and network administration at TU Braunschweig.

EDUCATION AND LANGUAGES

Computer Science studies, Technische Universität Braunschweig (2014-2016) · Technical college entrance qualification, IT (2014) · Government-certified technical assistant for IT, BSZ Stendal (2011-2013)
 German (native) · English (professional) · Spanish and Romanian (intermediate)
